Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-26,28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woodland (6056237) in view of Martorana et al (6576880) and Geraci et al (3985317).

Woodland shows all the details of the claimed aircraft except for the infrared camera and the staggered wing. Martorana et al in col 8 lines 1-11 states that the use of infrared cameras on UAV aircraft is well known. Geraci et al shows that the use of staggered wings is a well known wing arrangement. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Woodland with an infrared camera as taught by Martorana et al since it will provide observation through adverse weather and also to make the wing arrangement of Woodland a staggered wing as taught by Geraci et al since it will be more stable and higher lift.

1. Claims 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woodland in view of Martorana et al and Geraci et al as applied in the paragraph the above, and further in view of Rambo et al (5779190).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute an internal combustion engine and propeller of Rambo et al since it is efficient on slow UAV's and inherently are well known to have generators.

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
